Mercury goes Retrograde

Mercury is going retrograde from 10/12 through 11/1. Mercury is the planet associated with all avenues of communication, your siblings and short distance travel. When Mercury goes retrograde there is a tendency for communication to break down, contracts to fall through, more car accidents to occur and software problems to show up.

This is the time to put all of those 'RE' verbs into action. It's time to rethink, rewrite, redo, revamp, revisit, etc... things. It's a great time to edit something that you've already written, revisit that closet that needs some de-cluttering and it's a wonderful time to redo anything. Basically, it's a time to slow down and go over things again and make sure you have it right this time around. It tends to not be a good time to sign contracts due to miscommunication or second thoughts.

Financial Markets tend to vacillate quite a bit when Mercury is retrograde. You can expect the vacillation of the market to continue throughout this period.

The 4 day period before and after Mercury Retrograde starts can be a period of great inspiration. You might feel more inspired or intuitive during this time so be sure to make the most of it.

Just remember to be more precise in all areas of your communication, be more careful while you're driving, put all of those "re" verbs into action and have yourself a very enjoyable Mercury Retrograde.
